Mulholland

Varied materials unite and complement

Mulholland Stool
Designers Speak Collection
 Designed by Brian Graham

Mulholland barstools unite varied elements that complement one another even as they provide interesting contrasts. Metal, wood, and upholstery each makes its distinctive contribution to barstools that embody the modern architectural idea of simple forms and a structural frame that is both functional and visible. To enhance their versatility, Mulholland barstools are offered in arm and armless versions, with open or upholstered back.

Varied materials add interest even as they complement one another

An open back lightens the scale of the stool and draws the eye to its structural frame

Specifications

Barstool featuring an upholstered seat and wood back. Also available with an upholstered back between the seat and wood back. The frame is stainless steel available in Polished, Satin or Statuary Bronze. The seat is 2" -thick multi-density polyurethane foam wrapped over webbing that is stretched over a hardwood plywood frame. Catalyzed lacquer finish in all Cumberland finishes. Also available as a guest chair.
