Thick and Thin Modular Seating Assembly Instructions

Figure A

Package Contents

1. Two (2) Ganging Brackets

2. Twelve (12) #7 x 7/8" screws

**Note: Each seating unit is shipped with the above contents and two (2) brackets are required to gang two (2) units together*

Installation

1. Perform a rough layout while leveling each unit using the adjustable levelers located in the bottom of each leg.
2. Pilot holes have been pre-drilled where a ganging bracket could be located. Attach appropriate bracket to underside of seating using supplied screw.
3. Gang each unit together by sliding together to engage bracket (Figure A)
4. Final leveling may be necessary to line up each unit correctly

**Note: To separate units, lift up on the unit with the small angled bracket*
**Note: Proper installation and ganging is the responsibility of the installing agent. These instructions are to be used as a reference*
***Note: Under mount power unit, where applicable, may be moved to where convenient for customer, use existing hardware.*

Thick and Thin Airport Seating Armrest Installation Instructions

Package Contents

1. One (1) powered or non-powered upholstered armrest.
2. Four (4) 5/16-18 X 1-1/2"L screws.

**Note: Armrests are to be installed before airport seating is ganged together.*

Installation

1. Lineup armrest with holes in seating sectional.
2. Start each screw and lower armrest into position – armrest will touch seat and back.
3. Finish tightening each screw.
4. Gang airport seating using same process as other sectionals.

**Note: If powered armrest is installed, wires can be chased through access hole in side of seat box and out bottom.*

Thick and Thin Attached Laptop Table Installation Instructions

Package Contents

1. One (1) attached laptop table.
2. Four (5) #12 X 1-1/4"L screws.

**Attached laptop table can be attached anywhere along the perimeter of each section.*

Installation

1. Locate spot where laptop table will be attached.
2. Cumberland recommends a maximum of 4 1/2" overhang from 1" bottom panel.
3. Pilot drill each hole using Ø1/8" drill bit.
4. Attach table using supplied hardware.

***Note: Proper install is the responsibility of the installing agent. These instructions are to be used as a reference.*

Thick and Thin Under Seat Mount Power Box Instructions

Package Contents

1. One (1) power box.
2. One (1) under seat bracket.
3. One (1) table mount bracket (not used)
4. Two (2) #8 flat head screws.
5. Two (2) #10 wood screws.

Installation

1. Attach under seat bracket to power box using (2) #8 flat head machine screws.
2. Determine customer preferred location for power box and attach to seat as shown, using (2) #10 screws.
3. Connect power box to power for use.

**Note: On under seat mount forward edge of power box to be a minimum of 1" back from seat edge.*
