

# Finishes

---

Quality Cumberland craftsmanship deserves the finest natural materials. And the streamlined, classic designs that comprise the Cumberland collection are well suited to supertuous woods and finishes; sophisticated detailing and choice materials are perfect compliments.

## Standard Finishes on Maple

Our standard finish sample colors are shown on Maple. Maple is standard on all our products, but other wood species may be available as well. Maple is commonly used on furniture because of its subtle grain and ability to achieve a wide spectrum of colors. Cumberland has an extensive 18-color standard offering to allow designers to express the look particular to their specific project.

MP-0 Natural	MP-08 Java	MP-17 Coal	MP-27 Twill
MP-02 Straw	MP-11 Taro	MP-19 Chestnut	MP-28 Sterling
MP-03 Smoke	MP-12 Bark	MP-21 Nutmeg	MP-29 Charcoal
MP-07 Pecan	MP-13 Mink	MP-22 Cabernet	MP-46 Sienna
MP-24 Latte	MP-14 Bison	MP-23 Earth	

## Premium Walnut Finishes: Available on select products

Walnut is a premium and very dark wood with more visual grain. For those customers interested in expressing the classic look of walnut, we have provided a light and dark finish.

WL-95 Light Walnut	WL-97 Dark Walnut
--------------------	-------------------

## Premium Rift White Oak Low Sheen Finishes: Available on select products

Rift White Oak is a premium and very deep grain wood. There is often high contrast between the surface and the deepest part of the grain. Rift White Oak is also darker in color than maple.

WO-01-LS Sand	WO-05-LS Tea	WO-10-LS Carbon
WO-02-LS Raw	WO-06-LS Driftwood	

## Premium Cerused Rift White Oak Low Sheen Finishes: Available on select products

To accentuate the deep grain of Rift White Oak, we have developed a cerused finish. This involves a hand wiping process where a lighter color glaze is left in the deep grain to contrast with the surface color. The deeper and more common the grain, the more opportunity for the glaze, however, grain depth and quantity cannot be specified

WO-04C-LS Fog	WO-07C-LS Truffle	WO-14C-LS Poppy
---------------	-------------------	-----------------

## Premium Option A Exotic Woods: Available on select products

Option A Woods are species, not finishes. By default, they are offered as shown on the samples and in the finish selector with little or no stain added, to show their natural beauty. "Cumberland RW-Santos Rosewood and EN-Quartered Macassar Ebony veneers: As of 2009 these are a processed reconstituted veneer. These veneers have all of the visual characteristics of the natural veneers, but none of the problematic characteristics (deep pitting, cracking, checking) of the natural veneer."

FS Figured Sycamore	RW Santos Rosewood	EN Qtrd Macassar Ebony
FM Fiddleback Mahogany	WB Walnut Burl	

## General Finish Information

- 30-35 medium sheen catalyzed polyurethane finish is standard
- Full filled finishes require an additional charge of 15%
- Custom match finishes are a one-time charge of \$450 list
- Full filled high gloss finishes require an additional charge of 20% and are not recommended for high traffic surfaces

## Notes on Modular Seating (Plug-In, Thick + Thin, etc) Veneer and Finishes

As of 2014, Maple and Walnut specified on these pieces use processed reconstituted veneer. These veneers have all of the visual characteristics of the natural veneer, but none of the problematic characteristics (color and grain variations). This allows ganged pieces to achieve the more consistent color and grain match that is required when ganging piece-to-piece.

## Notes on Conference Tables and Casegoods

Cumberland casegoods are available in several different veneer and lumber species, whereas our occasional tables, benches, and all of our standard finish samples are on Maple. The Standard MP colors are also available for the additional species offered with the Cumberland casegoods. Due to natural graining differences, they make look slightly different, however, the color will be the same.

### Custom Finish Matching

Custom wood finishes are available at an additional one-time charge of \$450 list. Please contact Cumberland Customer Service for finish matching and approval.

### Formaldehyde Free Catalyzed Polyurethane Topcoat

Catalyzed polyurethane is now used on all finished wood surfaces. It provides best in industry quality while preserving the wood's natural beauty and characteristics without the 'plastic look' of other high quality finishes. Catalyzed polyurethane is formaldehyde free and may conform to LEEDS/BIFMA indoor air quality standards. Please refer to the "Wood Surface- Care Instructions" to explore the limitations of usage and proper care of this finish.

### Steelcase and Coalesse Finishes

The following Standard Coalesse and Steelcase finishes are matched at no additional charge (All on Maple). However, if an actual sample is required, a \$300 list charge will apply
