

Christina Table

The oval—an elemental form—receives an imaginative interpretation in the design of Christina tables. In addition to basic ovals, the line includes interlocking shapes created by notching a vertical edge on a slight angle. The result suggests a spiral while remaining true to the oval form. This versatility along with the range of heights and sizes offers many possibilities for interesting groupings.

Specifications

Side and coffee tables are available in maple and walnut veneers. These tables are designed to be used free-standing and/or in groupings that create unique clusters. Different heights and shapes with tapers and reverse feature offsets which invite fitting the tables together in interesting groupings. When used free-standing, the offset with its angled slice enlivens the design.

Offset Explained

The offset on these tables allows two of them to be nestled together and to touch at the top of offset. All of the tables with the offsets, will nestle with themselves and with all the other tables, the only exception is the 3457, which nestles with all other tables, but not with itself. It can nestle with itself but it will have a gap between the offset at the top. The reverse tapered table 3460 was specifically created by the designer to work together with 3457.
