

Isla Double

The Isla Double features five lounge seating sections and four bench seating sections that can be interchangeably combined with each other or with the bench pieces to create different layouts. It is comprised of a bench-to-lounge transition, straight section, end segment, and two types of curved elements – a compact 45° bend and a lazy 22.5° curve, which can be adapted to any setting. Isla Double is designed to bring people together in an informal setting and can be part of any lobby, waiting room, or lounge space. Its flexibility allows it to become part of a dynamic environment and to respond to the changing needs of any organization.

Specifications

Modular End, Straight, 22.5° Angle, 45° Angle and bench-to-lounge Transition. Seat is 4" thick multi-density polyurethane foam over a plywood frame. Each element of the lounge pieces has a short 10"h backrest.

Overview and Application

Fabric:

- Fabric Exceptions: Due to the curves on this product, fabrics with stripes or large patterns are not recommended as perfect alignment cannot be achieved. Mohair, velvet, high pile fabrics and very thick fabrics/leathers are not recommended. If in doubt, have a memo sent to our COM/COL Dept for testing.
- Fabric Orientation and Direction: The default direction of a directional patterned or striped fabric on the seat is always front-to-back on the seat and up-and-down on the backs
- Multiple Fabrics: Up to three fabrics may be specified on each unit. The base of the unit, the seat/back of the unit and the top cap. A \$150 list price per additional fabric upcharge applies. Please provide a sketch or signify on the order which fabric is the: base, seat/back and top cap. When specifying multiple fabrics in different price groups, the higher price material will be used for calculating the price.
- Yardage Calculations and Amounts: The yardage amounts are based on fabric that is plain (i.e. non-directional) and a full 54" width. Large repeats may affect the quantity of the fabric that is needed.
- Fabric and Leather Stretching: Some fabrics and all leathers naturally stretch with use and seat fabric tautness will vary depending upon the amount of stretch in the fabric/leather. Because of this natural stretch, the seat may appear loose with comfort wrinkles over time. We have engineered the product to minimize this, but in some cases and with some fabrics and leathers this is unavoidable and not the fault of manufacturing.

Power/Charging Options for Lounge Seating:

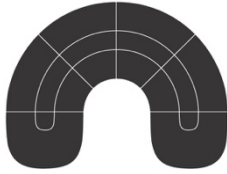

- The lounge seating units are available with and without power installed in the top center of the top cap.
- Units are 3"Dia and contain 1-Simplex outlet (15A), 1-USB Type A (3.1A) charging port and 1-USB Type C (3.1A) charging port
- Unit is standard in Nickel. Also available in Black or White.
- Units include a 10 ft cord
- Spillwater rated: Units are rated for use in horizontal surfaces
- Daisy chain accessories are available and ordered as a separate item independent of the seating units.

Ganging Mechanisms and Installation Notes

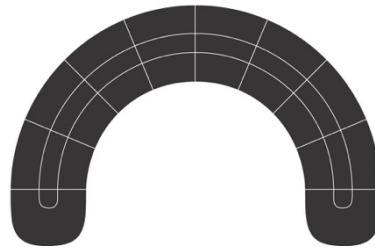

- Ganging units consist of a catch fork that tightens around a corresponding angle bracket when the two come in contact
- Each Isla unit will ship a ganging mechanism catch fork and corresponding angle bracket installed on each side at the factory
- Units are ganged when the upholstered pieces are pushed together, the connection is released by lifting
- When not in use the catch fork can be pivoted under the upholstery pieces
- Furniture should not be moved with the ganging device attached as it may cause damage to the mechanism
- All items are shipped with levelers. Items will need to be leveled for the gaps between adjacent pieces to be minimized and flush.
- Items need to be leveled before engaging ganging mechanisms.

Curved Angle Options

- Use of the 45° Angled units produces an intimate curve with a 3ft – 6in inside diameter and an outside diameter of 12 feet
- Use of the 22.5° Angled units produces a larger curve with an 11ft –10in inside diameter and an outside diameter of 20 ft – 5 in

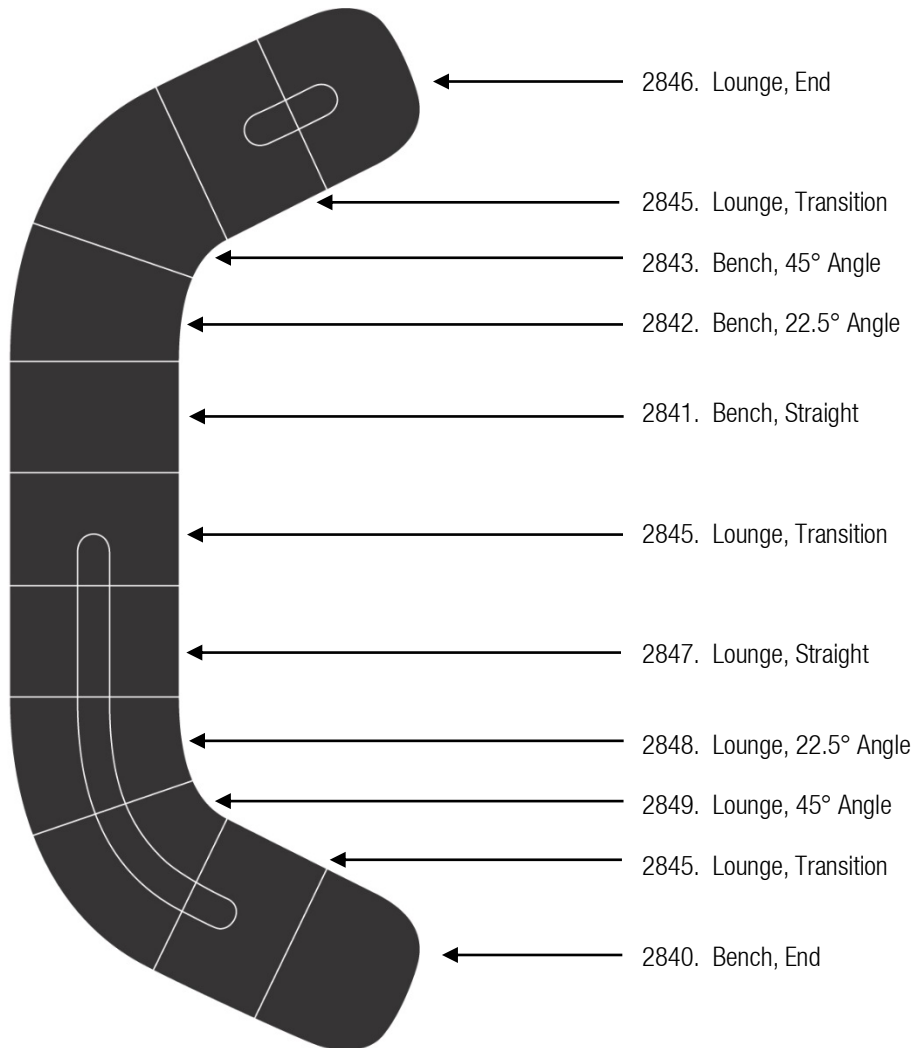

45° Angled units

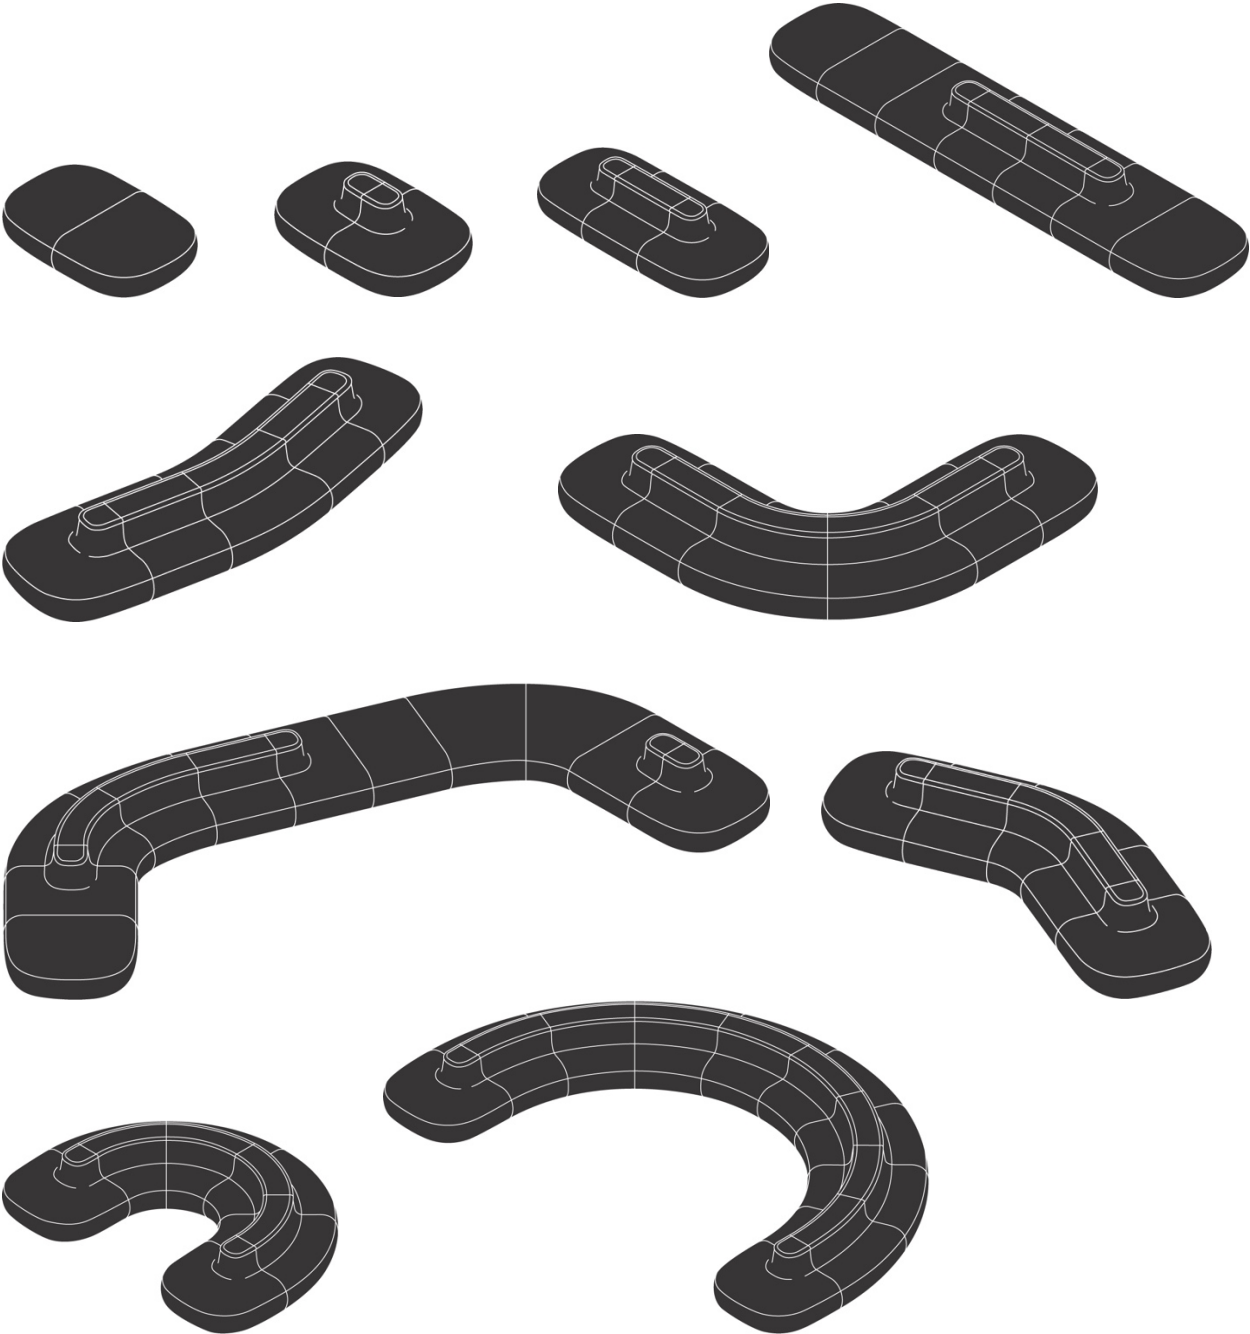

22.5° Angled units

Lounge Seating

Designed by Defne Koz, Marco Susani

Isla Double Lounge

The Isla Double lounge features five seating sections that can be interchangeably combined with each other or with the bench pieces to create different layouts. It is comprised of a bench-to-lounge transition, a straight section, an end segment, and two types of curved elements – a compact 45° bend and a lazy 22.5° curve, which can be adapted to any setting. Isla Double is designed to bring people together in an informal setting and can be part of any lobby, waiting room, or lounge space. Its flexibility allows it to become part of a dynamic environment and to respond to the changing needs of any organization.

Options – Specify:

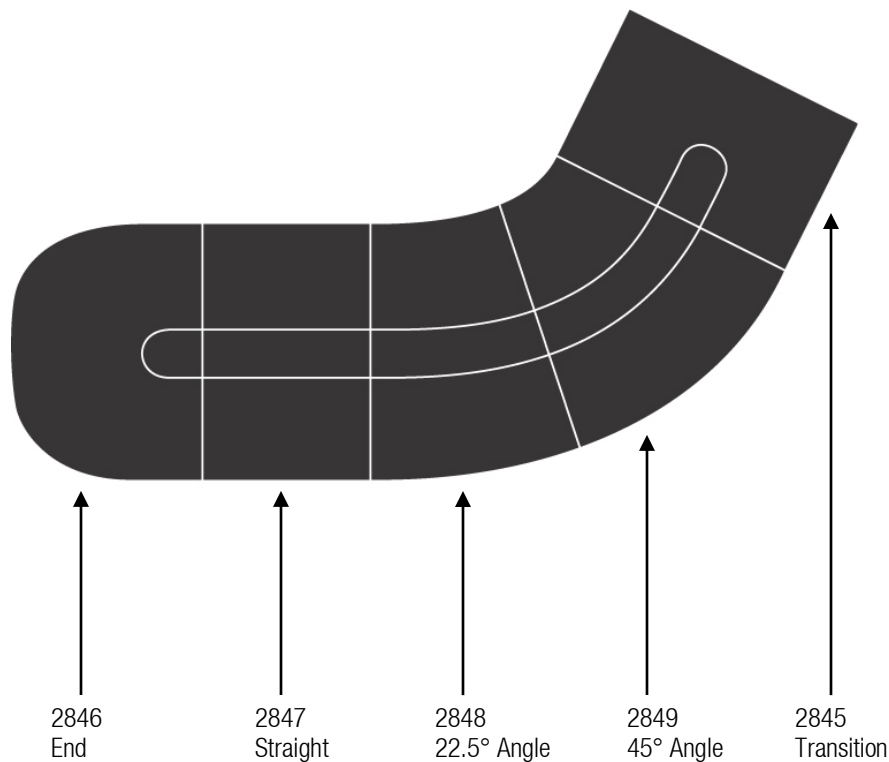

Upholstery: COM/COL, Graded Fabric, and Elmo Leather Program

Contrast: For seat/back in UPHOL1 and base of the lounge in UPHOL 2, add \$150 list per item

Exceptions: Due to the curves on this product, fabrics with stripes or large patterns are not recommended as perfect alignment cannot be achieved. Mohair, velvet, high pile fabrics and very thick fabrics/leathers are not recommended. If in doubt, have a memo sent to our COM/COL Dept for testing

Top Cap: An upholstered top cap that matches the seat/back (UPHOL1) is standard. An upholstered top cap that matches a contrasting base (UPHOL2) is available for no additional charge. For a contrasting top cap that matches neither (UPHOL3), add an additional \$150 list per item.

Power/Charging: Non-powered seating is standard. An optional power unit in Nickel finish, centered in the top of the top cap, is available for an additional \$357 list per item. Black and White units are also available for the same price.
